POWERTIES CONSULTING GROUP · A PATH FOR VETERANS

Build Your Own Consulting Business — With AI Doing the Heavy Lifting

You led people, ran operations, and got hard things done with whatever you had. That is exactly what small businesses are desperate for. This page is the whole idea, in plain terms.

THE SHORT VERSION Instead of job-hunting your way into somebody else's company, you start a small consulting firm of your own. PowerTies helps you set it up, puts AI tools and a live dashboard to work for you, matches you with businesses that need what you already know how to do, and coaches you while you run it. Your firm. Your clients. Your name on the door.

THE IDEA, IN PLAIN TERMS

Businesses everywhere are short on the same things the military trained into you: showing up, leading a crew, running a system, finishing the mission. Most owners can't hire that — it doesn't come in a job posting. So you don't apply for a job. You become the firm they hire. AI handles the paperwork, the follow-ups, and the number-watching that used to require an office staff, and a dashboard shows you your whole business at a glance. You bring the judgment and the leadership. The machines carry the clipboards.

HOW IT WORKS — FIVE STEPS

1. **Start with one working hour ($99).** We map your service experience to a business: what you'll offer, who needs it, what it should pay. You leave with a written plan, not a pep talk.
2. **Build the firm ($650 working session).** Name, setup, offer, pricing — the pieces of a real business, built from your real numbers, biggest wins first.
3. **Your AI and dashboard go live.** Your client list, your pipeline, your follow-ups, your money — one screen, set up for you, with AI doing the busywork between engagements.
4. **Get matched.** We connect you with businesses that need exactly what you do — matched to who you are, not stuffed into whatever opening exists.
5. **You consult. We coach.** You run the engagements and keep the client relationship. PowerTies stands behind you with coaching, systems, and a second set of eyes.

THREE WAYS TO SERVE

- **Embedded crew leader.** You step inside a business and lead its people day to day — the standard-setter on the floor.
- **Office systems builder.** You build the systems a business runs on — scheduling, follow-up, the office machinery — and hand them over running.
- **Firm builder.** You help an owner build or rebuild the business itself, piece by piece, as an outside operator.

WHAT IT COSTS — NOTHING HIDDEN

Start where you are: $99 for the first working hour and your written plan. $650 when you're ready to build the firm. Ongoing coaching is available after that, and we'll map it honestly in your first session — before you've spent anything beyond the $99. No course to buy. No franchise fee. The firm is yours.

And one thing that's free, always: if you never filed your VA claim, we'll walk you through filing it yourself — step by step, with AI guidance. Education and a guide, not a sales pitch; accredited VSO help is free too, and we'll point you to it.

★ REMEMBER You are not starting over. You are changing who signs the checks. The skills transfer — this just gives them a business to live in.

THE BOTTOM LINE One hour. One written plan. Then you decide. If the fit is there, you build a firm of your own with AI in your corner and a fellow veteran coaching behind you — and businesses get the leader they've been unable to hire.
